

CEM ÇELEBİ

Istanbul, Türkiye • cem.celebi.paul@gmail.com • linkedin.com/in/cem-celebi • French & Turkish national

PROFILE

Strategy and transformation professional, computer engineer by training, with 10+ years of experience turning complex business and technology challenges into programs that get executed. Experienced in prioritizing strategic initiatives, managing cross-functional programs, and translating emerging technologies into practical business outcomes. Combines structured problem-solving with senior stakeholder management and hands-on delivery. Works in English, French and Turkish.

EXPERIENCE

Axon Partners Group — Consulting

Gulf Region / Istanbul · 2023 – 2026

Senior Manager / Manager · Three years across program oversight, technology strategy, and regulatory impact analysis

• **Strategic Program Oversight:** Under a C-level mandate, oversaw a \$20M national digital transformation program carrying roughly a year of accumulated delay, sitting between two government authorities and a delivery consortium of global technology and consulting firms. Restored the approval cadence the program had lost, unblocking downstream implementation.

• **AI Impact Assessment:** Assessed the commercial and operational consequences of national AI regulation across affected sectors, turning an emerging technology into concrete implications business leaders could plan against, with the analysis adopted as the basis for a transitional regulatory approach by the authority.

• **Executive Reporting & Alignment:** Standing reporting line to C-level and VP-level sponsors across engagements, translating program complexity into briefs that shortened sign-off cycles and resolved friction between stakeholders.

• **Cost-Benefit Modelling:** Built cost-benefit models quantifying the financial consequences of upcoming digital regulations across affected sectors, giving decision-makers a concrete basis for choosing between options rather than relying on assumption.

• **Team Leadership:** Built and led a distributed 4-person team working across time zones on an emerging and technically ambiguous domain, establishing the governance structure that kept the workstream on track without direct oversight.

PwC — Advisory Services

Türkiye & Europe · 2016 – 2023

Manager / Senior Associate · Six years across transaction analytics, corporate investigations, and global technology transformation

• **Enterprise Transformation:** On secondment to the programme team of a global consumer goods company, owned functional data readiness for one market on its global trade marketing and distribution transformation, mapping how the market actually ran its commercial data onto the target Salesforce model and driving market teams through the gaps to readiness.

• **Transaction Analytics:** Supported M&A financial due-diligence engagements, consolidating and visualizing large transaction datasets in Power BI into the reports deal teams relied on.

• **Corporate Investigations & Fraud Analytics:** Led digital forensic operations on corporate fraud cases up to \$10M in exposure, producing findings that directly informed legal proceedings, personnel decisions, and the design of strengthened internal controls across affected organizations.

EDUCATION & CERTIFICATION

Galatasaray University — BSc, Computer Engineering

Istanbul · 2012 – 2016

Lycée Français Pierre Loti — Baccalauréat Français (Scientific)

Istanbul · 2011

AIGP — Artificial Intelligence Governance Professional (IAPP), in progress

PUBLICATIONS

• “AI vs AI: How artificial intelligence can enhance and threaten cybersecurity” — Axon Partners Group, 2024

• “Artificial intelligence and the cyberthreat landscape: Understanding and navigating the challenges” — Axon Partners Group, 2024

• “The Use of Data & Analytics in Internal Investigations” — chapter in İç Soruşturmalar Rehberi, Turkish Ethics & Reputation Society, 2020
